

Evaluation and outcomes: scientific studies and early interventions

Title	First Name	Last Name	Country	Paper Title	Presenting Author Names
Brief Oral Presentation					
Mrs	Jess	Barnes	Australia	A qualitative pilot study of in-patient experiences of the Circle of Security Parenting group at the Werribee Mother Baby Unit.	Mrs Jess Barnes
Ms	Wendy	Daniel	Australia	Designing an Outcome-Based Practice Framework: themes for a child protection and early intervention program	Ms Wendy Daniel
Dr	Alexandra	De Young	Australia	Preventive intervention for trauma reactions in young injured children: Results of a multi-site randomised controlled trial	Dr Alexandra De Young
Dr	Winnie Hs	Goh	Singapore	Evaluation on an integrated health and social service approach to optimize early childhood development for low income families	Dr Winnie Hs Goh
Mrs	Sharleen	Keleher	Australia	Disaster resilience in early childhood education	Mrs Sharleen Keleher
Miss	Janna	Matthess	Germany	Parent-Infant-Psychotherapy with high-risk mothers in shared living arrangements and facilities	Miss Janna Matthess & Miss Melanie Eckert
Mr	Ahmed Riaz	Mohamed	South Africa	The implementation of the Attachment and Biobehavioral Catch-up intervention for infants and young children with developmental delays in South Africa	Mr Ahmed Riaz Mohamed
Professor	Michael	Robling	United Kingdom	Longer-term impact of Family Nurse Partnership home visiting programme on maltreatment and child developmental outcomes: results of the BB:2-6 study.	Professor Michael Robling
Professor	Michael	Robling	United Kingdom	Establishing the long-term effectiveness of the Fostering Changes programme in promoting foster carer self-efficacy: The Confidence in Care trial.	Prof Michael Robling
Mrs	Antonella	Sansone-Southwood	Australia	A mindfulness relationship-based model to support maternal-mental health in pregnancy, maternal-foetal relationship and mother-infant relationship.	Mrs Antonella Sansone-Southwood
Miss	Tora	Söderström Gaden	Norway	"LongSTEP": Experiences from early phase implementation of an international randomized trial	Mrs Łucja Bieleninik & Miss Tora Söderström Gaden
Dr	Julie	Spielberger	United States	Improving relationships and preventing burnout in early childhood professionals: Implementation of a cross-system model of infant/early childhood mental health consultation	Dr Julie Spielberger
Ms	Mona Katharina	Sprengeler	Germany	Parent-Infant-Psychotherapy with mothers and their children diagnosed with regulatory disorders	Ms Mona Katharina Sprengeler & Ms Janna Matthess
Dr	Karli	Treyvaud	Australia	Improved parent-child relationships from a web-based early intervention program for families after preterm birth – a randomised trial.	Dr Karli Treyvaud
Dr	Cerith	Waters	United Kingdom	The Impact of Specialist Home-visiting on the Language Environment Provided by Young mothers and their Children's Language Outcomes	Dr Cerith Waters
Ms	Le Ann	Williams	Australia	Working Out Dads	Associate Professor Rebecca Giallo
Dr	Katie	Wood	Australia	An infant led approach to working with family violence: A methodological perspective ¹ .	Dr Katie Wood
Poster Presentation					
Dr	Rebecca	Beights	Australia	Robots as instructional tools? Examining visual attention to robot and human-delivered instruction in young children with and without autism	Dr Rebecca Beights
Dr	Noémi	Scheuring	Hungary	Parental Internet Use and its Relationship with Maternal Mood in an Early Childhood Eating and Sleeping Disorder Study	Dr Noémi Scheuring
Dr	Cerith	Waters	United Kingdom	Improving Maternal Mental Health and the Quality of the Mother-Infant Relationship in the Context of Perinatal Mood and Anxiety Disorders	Dr Cerith Waters
Ms	Marette	Abdelmaseh	Canada	Using Logic Models to support clinical-research partnerships: Evaluating an infant mental health service for immigrant mothers at risk for depression	Ms Marette Abdelmaseh

Dr	Beth	Russell	United States	Mixed methods evidence of longitudinal family functioning COVID-19 impacts among low-income families	Dr Beth Russell
Dr	Sarah	Shea	United States	Preparing out-of-home caregivers and adoptive parents for relationship-based parenting	Dr Sarah Shea
Dr	Sarah	Shea	United States	Pilot evaluation of a statewide reflective supervision consultation (RSC) model with infant-early childhood professionals	Dr Sarah Shea
Dr	Harvey	Karp	United States	Infant Sleep: Evaluation of a Womb-Like Sensory Intervention to Improve Infant Sleep	Dr Harvey Karp
Dr	Anja	Wittkowski	United Kingdom	Parenting interventions at the transition to parenthood: The evidence for Baby Triple P	Dr Anja Wittkowski
Dr	Anja	Wittkowski	United Kingdom	Findings from the Feasibility IMAGINE trial: Was a parenting intervention beneficial and acceptable to mothers with severe mental health problems?	Dr Anja Wittkowski
Dr	Anja	Wittkowski	United Kingdom	THRIVE: Trial of Healthy Relationship Initiatives for the Very-Early years: impact on maternal mental health	Dr Marion Henderson
Professor	Cindy	Mottrie	Belgium	Search results: The group as a treatment in mother-baby/parents-baby unit.	Professor Cindy Mottrie
Dr	Joy	Malinit	Philippines	The Outcome of an Attachment-Based Infant Mental Health Therapeutic Play Programme on Infant Temperament, Parent-Infant Relationship & Maternal Reflective Functioning	Dr Joy Malinit
Miss	Delphine	Vennat	France	Becoming a mother without a family support in the immediate postpartum : which impacts on the maternal psychic state ?	Miss Delphine Vennat
Professor	James	Reynolds	Canada	Assessment and intervention for at-risk children in the child welfare system	Professor James Reynolds
Ms	Grace	Branjerdporn	Australia	Sensory patterns, mental health and parenting outcomes in mothers with admitted to a mother-baby unit	Ms Grace Branjerdporn
Workshop					
Ms	Alma-Jane	O'Donnell	Australia	Improving infant mental health outcomes in the early learning sector: for children who have experienced trauma: research findings	Ms Alma-Jane O'Donnell
Dr	Anja	Wittkowski	United Kingdom	The trouble with trials in the parenting field: a workshop to discuss pertinent problems and solutions	Dr Anja Wittkowski
Symposium					
Ms	Melanie	Eckert	Germany	Parent-Infant-Psychotherapy and Intervention Research- current Projects and developments	Ms Melanie Eckert, Ms Katharina Richter, Jody Manly, Ms Nicole Canin, M.D. PhD Hisako Watanabe
				Prevalence of psychosocial stress and mental health disorders and Evaluation of Parent Infant Psychotherapy (SKKIPPI)	Ms Melanie Eckert & Ms Katharina Richter
				Maternal States of Mind and Infant responsivity in premature Infants receiving specialised In-Hospital Care	Nicole Canin
				PROMISE- Evaluation of Child-Parent Psychotherapy to high-risk impoverished families in combination with a Community Health Worker home visitation model	Jody Manly
Professor	Catherine	McMahon	Australia	Attachment theory informed interventions applied in different contexts and risk groups: Emerging evidence from New Zealand and Australia.	Professor Catherine McMahon, Anne-Marie Maxwell, Dr Anna Huber & Dr Jane Kohlhoff
				Circle of Security Parenting program: Effectiveness for parents with mood problems	Anne-Marie Maxwell
				Changes in caregiving representations after individually or group delivered hybrid Circle of Security intensive intervention with New Zealand caregiver-child dyads	Dr Anna Huber
				Parent Child Interaction Therapy with Toddlers (PCIT-T): Results from a wait-list controlled trial	Dr Jane Kohlhoff

Professor	J. Kevin	Nugent	United States	Randomized Controlled Trials testing the efficacy of the Newborn Behavioral Observations (NBO) system in Australia, Denmark, Japan and the US.	Professor J. Kevin Nugent, Susan Nicolson, Ingeborg Kristensen, Eiko Saito & Lise Johnson
				Supporting the newborn-parent relationship when there is parental depression or anxiety: Australian trial of the Newborn Behavioural Observations (NBO).	Susan Nicolson
				The impact of an NBO-based intervention on the mental health of mothers with late preterm infants	Lise Johnson
				A randomized controlled trial on the efficacy of an early parenting relationship-building intervention using the Newborn Behavioral Observations in Japan	Eiko Saito
				The Effects of the Newborn Behavioral Observations (NBO) system with at-risk infants in Early Intervention: a Multi-site Randomized Controlled Trial.	Professor Kevin Nugent
				Health visitors' competences before and after implementing the Newborn Behavioral Observations (NBO) in a community setting: A cluster randomised study.	Ingeborg Kristensen
Professor	Michael	Robling	United Kingdom	International dissemination and adaptation of the Nurse-Family Partnership Programme: gathering evidence across borders.	Professor Michael Robling, Dr Rebecca Cannings-John, Dr Verena Dahne & Dr Fiona Lugg-Widger, Leonie Segal
				Delivering a modified nurse family partnership program to Aboriginal mothers and babies in Australia – implementation success and child outcomes.	Leone Segal
				Establishing an English trial cohort to determine short and medium-term family outcomes of specialist home visiting for first-time teenage mothers.	Dr Fiona Lugg-Widger
				Factors influencing theory of mind development in preschoolers within the context of early interventions	Dr Verena Dähne
				Evaluating the Family Nurse Partnership Programme in Scotland: a natural experiment approach	Dr Rebecca Cannings-John
